**NOTES: Winterize sprinkler connections.** A sprinkler connection is located next to your water meter. This connection needs to be turned off in the fall, so it doesn't freeze and break during the winter months. A water shut off key is required to turn the connection off. The key can be purchased at any plumbing supply store. The Public Works Dept. reminds all residents that the area (barrow pit) between your property line and the street asphalt must be left accessible for water flow. In the event of flooding or when the hydrants are flushed it is necessary for the water to flow past your property and remain in the road right-of-way. Change in this barrow pit area requires a permit from the City. If a resident has blocked this drainage flow and your neighbor's property is flooded, you will be liable for the damage.

### **Installing a fence on your property?**

Prior to erecting a fence Enoch City highly recommends you meet with the City's Building Inspector or Zoning Administrator for guidance. The City does not require a building permit to erect a fence, but some City ordinances may dictate or prevent certain types of fences in various zones. Also, it is important to know where public utility easements are located on your property and their possible effect on the placement of your fence. An appointment can be made with the building inspector or zoning administrator by calling 586-1119.

**Dogs – All dogs are required to be licensed each year. Please call the City Office for more information, 586-1119.**
